HUMAN NATURE™

Interface® *Hospitality*

DESIGN YOUR FLOOR!

When we follow nature's example, designing spaces can ignite our senses through light, color, texture and detail. Human Nature Collection was designed as a beautiful foundation for those spaces, made up of five different textures in 25cm x 1m skinny planks. Borrowing from natural elements, HN810™, HN850™ and HN840™ placed in sequence blend seamlessly in an organic movement that shows no hint of the corners or edges of the tile. HN820™ and HN830™ extend the range from very low profile to wildly-full and neutral to colorful.

Like everything in the natural world, transitions are varied. The skinny plank format lends itself to fluid transitions with its graceful, elongated dimensions. More dynamic connections are made when mixing hues and textures with the bold geometry of the tile.

WHY MODULAR CARPET TILE?

Flexibility

Keep Your Floor Beautiful. Modular carpet tile allows you to play with pattern and design without having to special order carpet sizes. And the same flexibility that lets you create your floor helps you keep it looking good because in-house staff can easily replace individual tiles that become damaged or heavily soiled—no down time or outside contractors required.

Intersept®

Mold Protection. No matter what's spilled on the floor, our proprietary antimicrobial preservative, Intersept®, protects our modular carpet against the growth of odor-causing bacteria—guaranteed. With proper maintenance Intersept treated carpet safely and effectively inhibits the growth of mold and other bacteria so your floors are always fresh.

TacTiles®

No Glue Installation. Installation or reconfiguration with our glue-free TacTiles installation system means there's no glue smell and no drying time. Guests can use the room as soon as the last piece is laid and all they'll notice is a beautiful floor.

Sustainable Choice

Environmental Responsibility. Interface is the industry's first to earn an EPD (Environmental Product Declaration), which evaluates consistent factors based on full lifecycle assessment (LCA). In addition, all of our products with GlasBac®, GlasBac®RE and NexStep® backings meet NSF/ANSI 140 Sustainable Carpet Assessment Standard (SCAS).

Less Waste

Save Money. Interface Hospitality's carpet tile averages just 3.9% installation waste compared to as much as 18% or more with patterned roll carpet. Use our non directional styles with an average of 1.5% waste and save even more. That means more of your flooring investment stays on the floor—not in a dumpster.

cool carpet™

Cool Carpet™
Our third party verified carbon offset program zeroes out all greenhouse gas (GHG) emissions associated with the entire lifecycle of your carpet.

Sustainable Carpet Assessment Standard (SCAS)
The only carpet sustainability standard in North America that evaluates the environmental impact of carpet for its entire lifecycle.

CRI Green Label Plus
An independent testing program that identifies carpet and adhesives with very low emissions of VOCs to help improve indoor air quality.

Environmental Product Declaration (EPD)
A statement of product ingredients and environmental impacts over the entire lifecycle of a product. A comprehensive life cycle assessment (LCA) is performed to ISO standards to develop an EPD, after which both the EPD and the LCA must be third party verified.
