

EPD

Environmental Product Declaration

Interface

Human Nature HN850 CQuest Bio

surface pile weight: 570 g/m²

pile material: polyamide 6 with 100% recycled content

backing: CQuest Bio backing, heavy backing with textile bottom

GUT/Prodis ID:

57ACB90F

**These EPD data are only valid in combination with
the environmental product declaration EPD-INT-20200181-CCC1-EN published by Institut
Bauen und Umwelt e.V. (IBU) and a GUT/Prodis license**

**This data set gives product specific LCA results
based on the calculation procedure described in the above mentioned EPD.**

Calculation method for similar Products of the EPD document

The EPD document is valid for all products with a surface pile weight lower or equal to the declared maximum pile weight of 1500 g/m².

The respective declaration number is EPD-INT-20200181-CCC1-EN .

This document indicates more specific LCA results for (a) product(s) with identical material compositions and production parameters. The product(s) belong(s) to the same family of products and only differ in its/their pile weight(s).

LCA results show a linear correlation with the total pile weight, for all impact categories (IC) and all modules (A-D). It is possible to calculate specific LCA results (IC_x) for every carpet (x) within the declared group of products in relation to its total pile weight (P_x).

The total pile weight (TPW) is the sum of surface pile weight (SPW) and dead pile weight (DPW):

$$TPW = SPW + DPW$$

The surface pile weight is the technical relevant value according to EN 1307 and has to be mentioned in technical specification. As shown in the figure below alternatively to the total pile weight the surface pile weight can be used to calculate LCA results (IC_x).

Graph 1: General formula for the calculation of all impact categories IC_x.

General Information on use stages B1 to B7

LCA results indicate environmental impacts resulting from use stage B1 to B7.

For textile floor coverings only modules B1 (use) and B2 (maintenance) are taken into account. Modules B3 (repair), B4 (replacement), B5 (refurbishment), B6 (operational energy use) and B7 (operational water use) are not relevant during the service life of textile floor coverings.

Module B1 'use' includes emissions to the indoor air during the use stage. Relevant emissions only occur in the first year of life (see LCA: Calculation rules).

Module B2 'maintenance' includes cleaning procedures.

Reference service life (RSL)

The actual service life of textile floor coverings depends on a wide range of various impact factors such as the allocation of the application area to the use class, maintenance, intensity of use and most often fashion and building related aspects. Therefore, technical service life cannot be defined for textile floor coverings.

Total environmental impacts from module B2

Total environmental impacts have to be calculated by taking into account the service life of textile floor coverings. Therefore, the assumed real life (ARSL) has to be used for the calculation of total environmental impacts taking into account the expected use conditions (see RSL). Module B2 (maintenance) is depending on the service life.

Values for module B2 given in the result tables are indicated for the period of one year. They have to be multiplied by the ARSL of the textile floor covering taking into account building related aspects.

The influence of the maintenance period on the Global Warming Potential (GWP) of the whole life cycle of a textile floor covering - differentiated for 3 end-of-life scenarios - is illustrated in the graph below.

3 end-of-life scenarios:

Scenario 1: 100 % Landfill disposal

Scenario 2: 100 % Municipal waste incineration

Scenario 3: 100 % Recycling in the cement industry

Graph 2: Global Warming Potential (GWP) - aggregation of module A to module C - taking into account a maintenance period of 1 year compared to a maintenance period of 10 years - for the three declared end-of-life scenarios.

1. Information on the product Human Nature HN850 CQuest Bio

Product description

Name	Value	Unit
Type of manufacture	tufted tiles	-
Yarn type	polyamide 6 with 100% recycled content	-
Total pile weight	1085	g/m ²
Surface pile weight	570	g/m ²
Dead pile weight	515	g/m ²
Secondary backing	CQuest Bio backing, heavy backing with textile bottom	-
Product Form	planks 25 cm x 100 cm	-
Max. total carpet weight	4965	g/m ²

Base materials / Ancillary materials

Name	Value for category	Unit
Polyamide 6	21,9	%
Polyester	2,4	%
Polypropylene	1,0	%
Limestone	51,8	%
Aluminiumhydroxide	6,9	%
Ethylene vinyl acetate (EVA)	7,6	%
Wood resin	5,8	%
Glass fibre	0,7	%
Additives	2,0	%
Product specific recycled content minimum	80	%

LCA: Declared Unit

Name	Value for category	Unit
Declared unit	1,0	m ²
Conversion factor to 1 kg	0,20	m ² /kg
Mass reference	5,0	kg/m ²

LCA: Scenarios and additional technical information

All indicated values refer to the declared functional unit

Transport to the construction site (A4)

Name	Value for category	Unit
Litres of fuel (truck, EURO 0-5 mix)	0,0116	l/100km
Transport distance	700	km
Capacity utilisation (including empty runs)	55	%

Installation in the building (A5)

Name	Value for category	Unit
Material lost	0,15	kg

Maintenance (B2)

Indication per m² and year

Name	Value for category	Unit
Maintenance cycle (wet cleaning)	1,5	1/year
Maintenance cycle (vacuum cleaning)	208	1/year
Water consumption (wet cleaning)	0,004	m ³
Cleaning agent (wet cleaning)	0,09	kg
Electricity consumption	0,314	kWh

End of Life (C1-C4)

Name	Value for category	Unit
Collected as mixed construction waste (scenario 1 and 2)	4,97	kg/m ²
Collected separately (scenario 3)	4,97	kg/m ²
Landfilling (scenario 1)	4,97	kg/m ²
Energy recovery (scenario 2)	4,97	kg/m ²
Energy recovery (scenario 3)	2,02	kg/m ²
Recycling (scenario 3)	2,95	kg/m ²

LCA: Results for Human Nature HN850 CQuest Bio

(calculated with a total pile weight of 1085 g/m²)

The declared result figures in module B2 have to be multiplied by the assumed service time (in years) of the floor covering in the building considered (see chapter: 'General Information on use stages B1 to B7').

Information on un-declared modules:

Modules B3 - B7 are not relevant during the service life of the carpet and are therefore not declared.

Modules C1, C3/1, C4/2 and C4/3 cause no additional impact and are therefore not declared.

Module C2 represents the transport for scenarios 1, 2 and 3.

Description of the system boundary

(X = Included in LCA; MDN = Module not declared)

State of production	State of construction phase	State of use	End of life state	Credits and loads after life												
raw material supply A1 X	transport A2 X	manufacturing A3 X	delivery A4 X	installation A5 X	use B1 X	maintenance B2 X	repair B3 MND	replacement B4 MND	renewal B5 MND	energy use B6 MND	water use B7 MND	stop of use / demolition C1 MND	transport C2 X	waste management C3 X	disposal C4 X	reuse, recovery and recycling potential D X
